

Get eBooks through our statewide effort

eBooks.masslibsystem.org

About the Project:

The MA eBook Project was created to better serve, educate, and inform the patrons of Massachusetts Libraries. The project attempts to shrink the growing gap in equality of access to information as well as empower Massachusetts residents to pursue their passions. The first of its kind, the MA eBook Project will begin with 50 pilot libraries, before implementing statewide access for all.

The MA Statewide eBook Project is brought to you by the Massachusetts Library System in partnership with the Massachusetts Board of Library Commissioners and your local library, funded, in part, by the federal Institute of Museum and Library Services.
